

CASES Thunder .P

Tool trolley

General features

Internal Configuration

Versions

This specific model comes with two hinged lockable and replaceable tool boards with elasticated pockets. The upper tool board can accommodate tools on both sides, the lower pallet on one side. Small hardware can be stored in the recessed pocket. Behind the upper pallet there is a double space document pocket. The lower area allows the professionals to store large tools, power tools, spare parts and comes with three multi purpose organizers.

CASES Thunder .P

Tool trolley

High density extra thick polyethylene tool case with an oversized hardened aluminium frame and integrated professional trolley. The hardened light weight alloy telescopic handle with "one push" easy operation button, as well as the large diameter silent wheels standing on a steel axel, grant maximum travel comfort. Comes with two metal latches with keys and two oversized handles fixed on steel pins for daily heavy-duty use in both vertical and horizontal lifting. Additional safety is provided by the two internal compasses that hold in place the lid when open, to avoid accidental closing of the loaded lid of the case. The big protective corners and a body long metal hinge ensure years of trouble-free reliable service. Two or more THUNDER tool cases can be positively stacked.
